Google search results for "teachable machine". The search results show the Teachable Machine website as the top result. The website URL is <https://teachablemachine.withgoogle.com>. The website description is: "Teachable machine is a web-based tool that makes creating machine learning models fast, easy, and accessible to everyone. (Note: you can find the first ...". The website features sections for "Get Started", "Image Model", "GIF", and "FAQ".

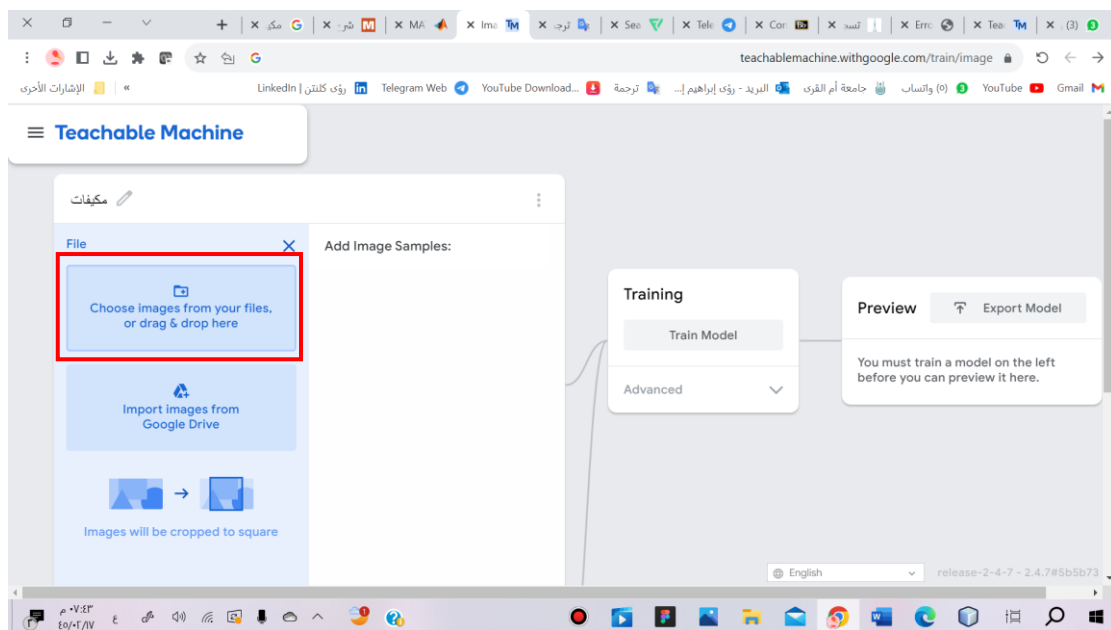

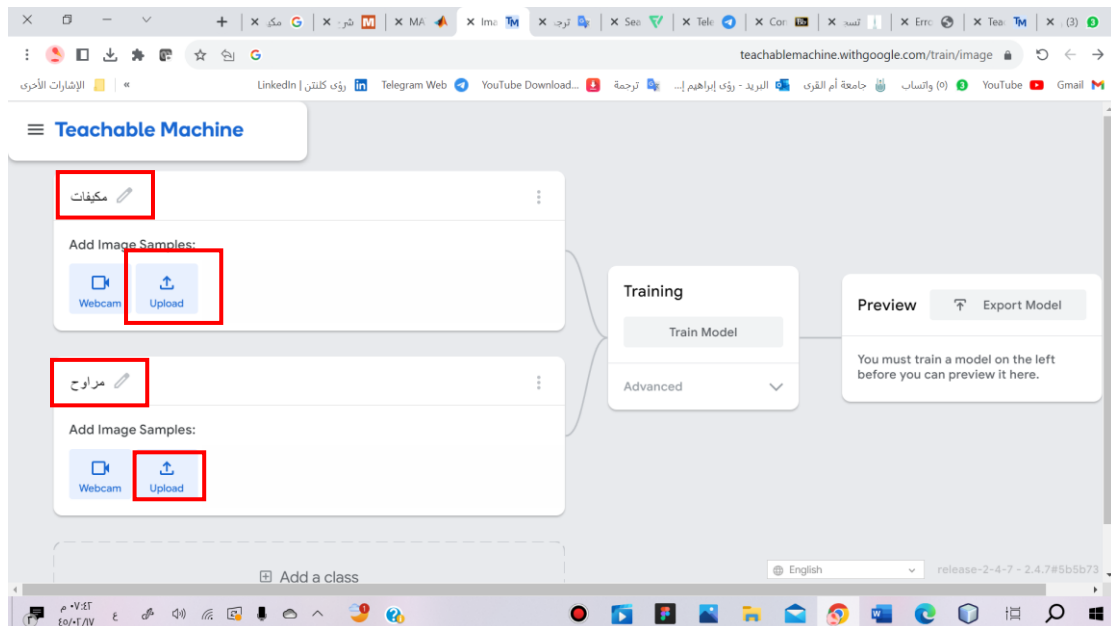

The Teachable Machine website is displayed below. The main heading is "Teachable Machine". The subheading is "Train a computer to recognize your own images, sounds, & poses." The text below the subheading is "A fast, easy way to create machine learning models for your sites, apps, and more – no expertise or coding required." A red box highlights the "Get Started" button.

Below the "Get Started" button, there are logos for various technologies: TensorFlow.js, p5.js, Coral, node, and AR.js.

The image consists of two screenshots of the Teachable Machine web interface, showing the process of uploading a model.

Top Screenshot: The interface shows the 'Export your model:' section. The 'Upload (shareable link)' option is selected. The 'Upload my model' button is highlighted with a red box. Below this, the 'Your sharable link:' field shows a placeholder URL: `https://teachablemachine.withgoogle.com/models/[...]`. The 'Code snippets to use your model:' section shows a JavaScript snippet for a webcam-based image model.

Bottom Screenshot: The interface shows the 'Export your model:' section. The 'Upload (shareable link)' option is selected. The 'Update my cloud model' button is highlighted with a red box. Below this, the 'Your sharable link:' field shows a specific URL: `https://teachablemachine.withgoogle.com/models/1UAuX3H1V/`. The 'Code snippets to use your model:' section shows a JavaScript snippet for a webcam-based image model.
